Make Your Next Smile Your Best Smile

The Leading All-on-4[®] Dental Implant Clinics

Dental problems can cause physical and emotional distress, at any age. But as we age, our teeth can deteriorate and become more susceptible to gum disease, which can result in tooth loss. Traditional dentures have long been a solution for those suffering from major tooth loss, but they can come with a variety of problems, including discomfort, slipping, and difficulty chewing. Fortunately, there is a solution that offers a more comfortable and secure alternative to traditional dentures: **All-on-4[®] Dental Implants.**

"It's just changed my whole outlook on life."

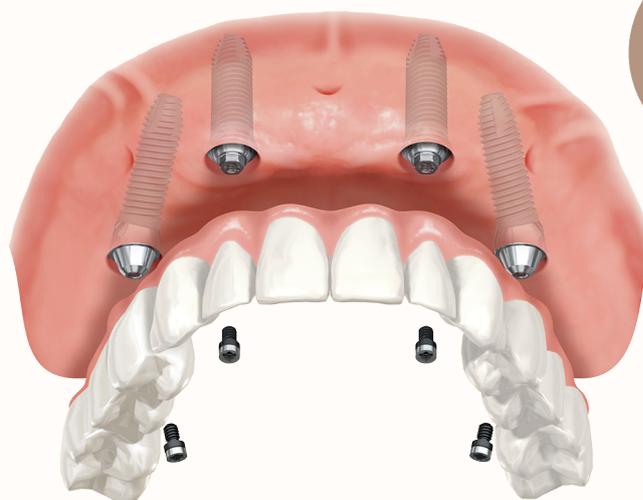

Renee, Next Smile Patient

What are All-on-4® Dental Implants?

All-on-4® Dental Implants are an innovative dental implant solution that uses just four strategically placed implants to support a full arch of replacement teeth. This approach allows for a more stable and long-lasting solution than traditional dentures, which often require messy adhesives and can still slip or cause discomfort.

All-on-4® Dental Implants have quickly become a popular choice for people who have suffered from tooth loss or other dental problems. The surgical process is streamlined and minimally invasive, often eliminating the need for bone grafting. In most cases, a bridge of temporary teeth can be placed within just one day. With proper care and regular maintenance, the implants can last for decades – providing a functional, natural-looking smile. Backed by over 25 years of clinical data, All-on-4® boasts a proven 98% success rate¹, offering far superior outcomes compared to older, more invasive dental restoration methods.

The Benefits of All-on-4[®] Dental Implants

All-on-4[®] Dental Implants are an advanced solution for people experiencing tooth loss, gum disease, or dissatisfaction with traditional dentures. With proven success and transformative results, All-on-4[®] Dental Implants offer a life-changing alternative to traditional dentures, restoring both function and confidence. Here are some of the key benefits:

Improved Chewing and Digestion

Unlike traditional dentures that can shift and make eating difficult, All-on-4[®] implants provide a secure foundation for replacement teeth. This allows for better chewing efficiency, enabling patients to enjoy a broader range of foods and support better digestion and nutrition – contributing to overall health and well-being.

Boosted Confidence and Quality of Life

All-on-4[®] Dental Implants provide a more natural looking and secure solution that can help boost confidence and self-esteem. Patients report being able to eat, speak, and smile with greater ease and without fear of their replacement teeth slipping or shifting.

Long-Term Durability

All-on-4[®] Dental Implants provide a long-lasting solution for tooth loss and other dental problems. Traditional dentures may need to be replaced every few years, while All-on-4[®] Dental Implants can last for decades with proper ongoing care. This can provide peace of mind for those who may not want to undergo frequent dental procedures.

Natural Look and Feel

Crafted in collaboration with your dental team, All-on-4® implants are custom-designed to suit your facial features and bite. The result is a natural-looking, aesthetically pleasing smile that also feels comfortable and functional – closely resembling natural teeth in both appearance and functionality.

Improved Oral Health

All-on-4® Dental Implants can also improve overall oral health. When teeth are lost or damaged, it can lead to more complex dental and health issues. All-on-4® Dental Implants provide a stable and secure foundation for replacement teeth, which can help prevent these types of problems.

Preserved Jawbone and Facial Structure

One of the most important health benefits is the stimulation of the jawbone, which helps maintain bone density and prevent deterioration. Traditional dentures can accelerate bone loss (bone resorption), leading to a sunken facial appearance. All-on-4® implants support the jawbone, helping preserve facial structure and a more youthful appearance.

Why choose Next Smile Australia?

At Next Smile Australia, we're proud to be the leading national provider of All-on-4[®] Dental Implants, driven by a passion to achieve the best possible outcomes through clinical excellence.

We deliver the All-on-4[®] procedure with unmatched precision and a patient-first approach, backed by over 25 years of clinical research. As the only provider in Australia personally endorsed by Professor Malo – the inventor of the All-on-4[®] treatment concept – we follow the Gold Standard surgical protocol that sets us apart.

We've helped over 10,000 patients reclaim their smiles and dedicate ourselves to this life-changing treatment every single day. Your comfort and care are always our priority, and we're committed to providing a judgment-free experience grounded in our core values: Excellence, Dedication, Empathy, Honesty, and Innovation.

You can trust us to deliver implant solutions that are tailored to you – designed to restore confidence, function, and quality of life.

The Next Smile Two-Stage Process

One of the key features of our Gold Standard approach is our carefully planned two-stage process. Within 24 hours² of surgery, we fit a set of high-quality provisional teeth (bridge), which typically stay in place for around six months – depending on your individual healing needs.

This stage gives us time to assess important factors like bite alignment, speech (phonetics), aesthetics, and comfort as your mouth adapts to the implants. After healing, you'll have a review with your surgeon, and our skilled technicians at Next Smile Labs will custom-design your final fixed teeth (bridge). These are crafted to your preferences – including shape, colour, and lip support – to help create your perfect smile.

Unlike some providers who place final teeth on the same day as surgery, we believe in giving your implants time to properly integrate with the jawbone before completing the treatment. This approach maximises comfort, function, and long-term success.

Another benefit? Your provisional teeth are safely stored with us and can be temporarily refitted if your final teeth ever need repair – so you're never without a smile.

Teeth Crafted For Beauty And Durability

At Next Smile Australia, we are committed to providing teeth that are built for both beauty and durability. Our final teeth (bridges) come with a unique internal milled titanium bar, similar to steel reinforcing in concrete, ensuring maximum strength and durability.

²Our goal is to deliver provisional teeth within 24 hours of implant surgery. However, in some cases, considerations may require a longer timeframe to ensure optimal healing and long-term success.

Where our Experience Shines

Our experience in performing All-on-4® Dental Implant procedures is unparalleled, with our dental surgeons having performed more procedures than most other clinics in Australia. We partner with specialist and experienced professionals, who are committed to ongoing education and innovation, ensuring the best possible outcomes for our patients.

Built for Purpose

We believe a safe surgical environment is essential and it's a key reason we're Australia's leading All-on-4® Dental Implant provider. Our state-of-the-art Super Clinics are purpose-built for All-on-4® procedures and meet the highest standards of surgical care to ensure every detail is carefully managed.

Many of our Super Clinics also feature on-site Next Smile Labs, where your new teeth (bridges) are crafted with precision and care. Having our Labs on-site ensures a higher level of quality control, ensuring that you receive genuine All-on-4® Dental Implants, bridge components and excellent craftsmanship.

The Next Smile Australia Warranty

We offer a comprehensive warranty on your new smile – covering both the implants and final bridge – providing peace of mind and long-term reassurance. With proper at-home care and regular professional maintenance, your new teeth are designed to last for many years to come.

Our authentic, Swiss-made Nobel Biocare All-on-4[®] Dental Implants include: **Implants:** 5-year warranty

Your final bridge is made up of two key components, each covered by its own warranty:

Titanium Bar: 5-year warranty

Teeth: 3-year warranty³

³Based on our Gold Standard Malo Protocol. Warranty may vary for alternate treatment options.

Aftercare For Your New Smile

Once your final teeth are fitted, caring for your new smile is simple. While they aren't prone to decay like natural teeth, good oral hygiene and regular visits to our Next Smile dental hygienists are essential for cleaning and bridge checks.

Our commitment to care continues before, during, and after your procedure. Your dedicated treatment coordinator will guide you with personalised advice on diet and maintenance.

For added peace of mind, your natural-looking teeth are covered by our Next Smile Treatment Warranty – provided you follow the recommended maintenance schedule to keep your smile healthy and long-lasting.

Dental Payment Options to Suit You

At Next Smile Australia, we believe every Australian should have access to the dental care they need. That's why we offer a range of flexible payment options to suit different circumstances and preferences. Whether you're ready to pay upfront, looking for manageable weekly payments, or exploring the early release of Superannuation, our team is here to help.

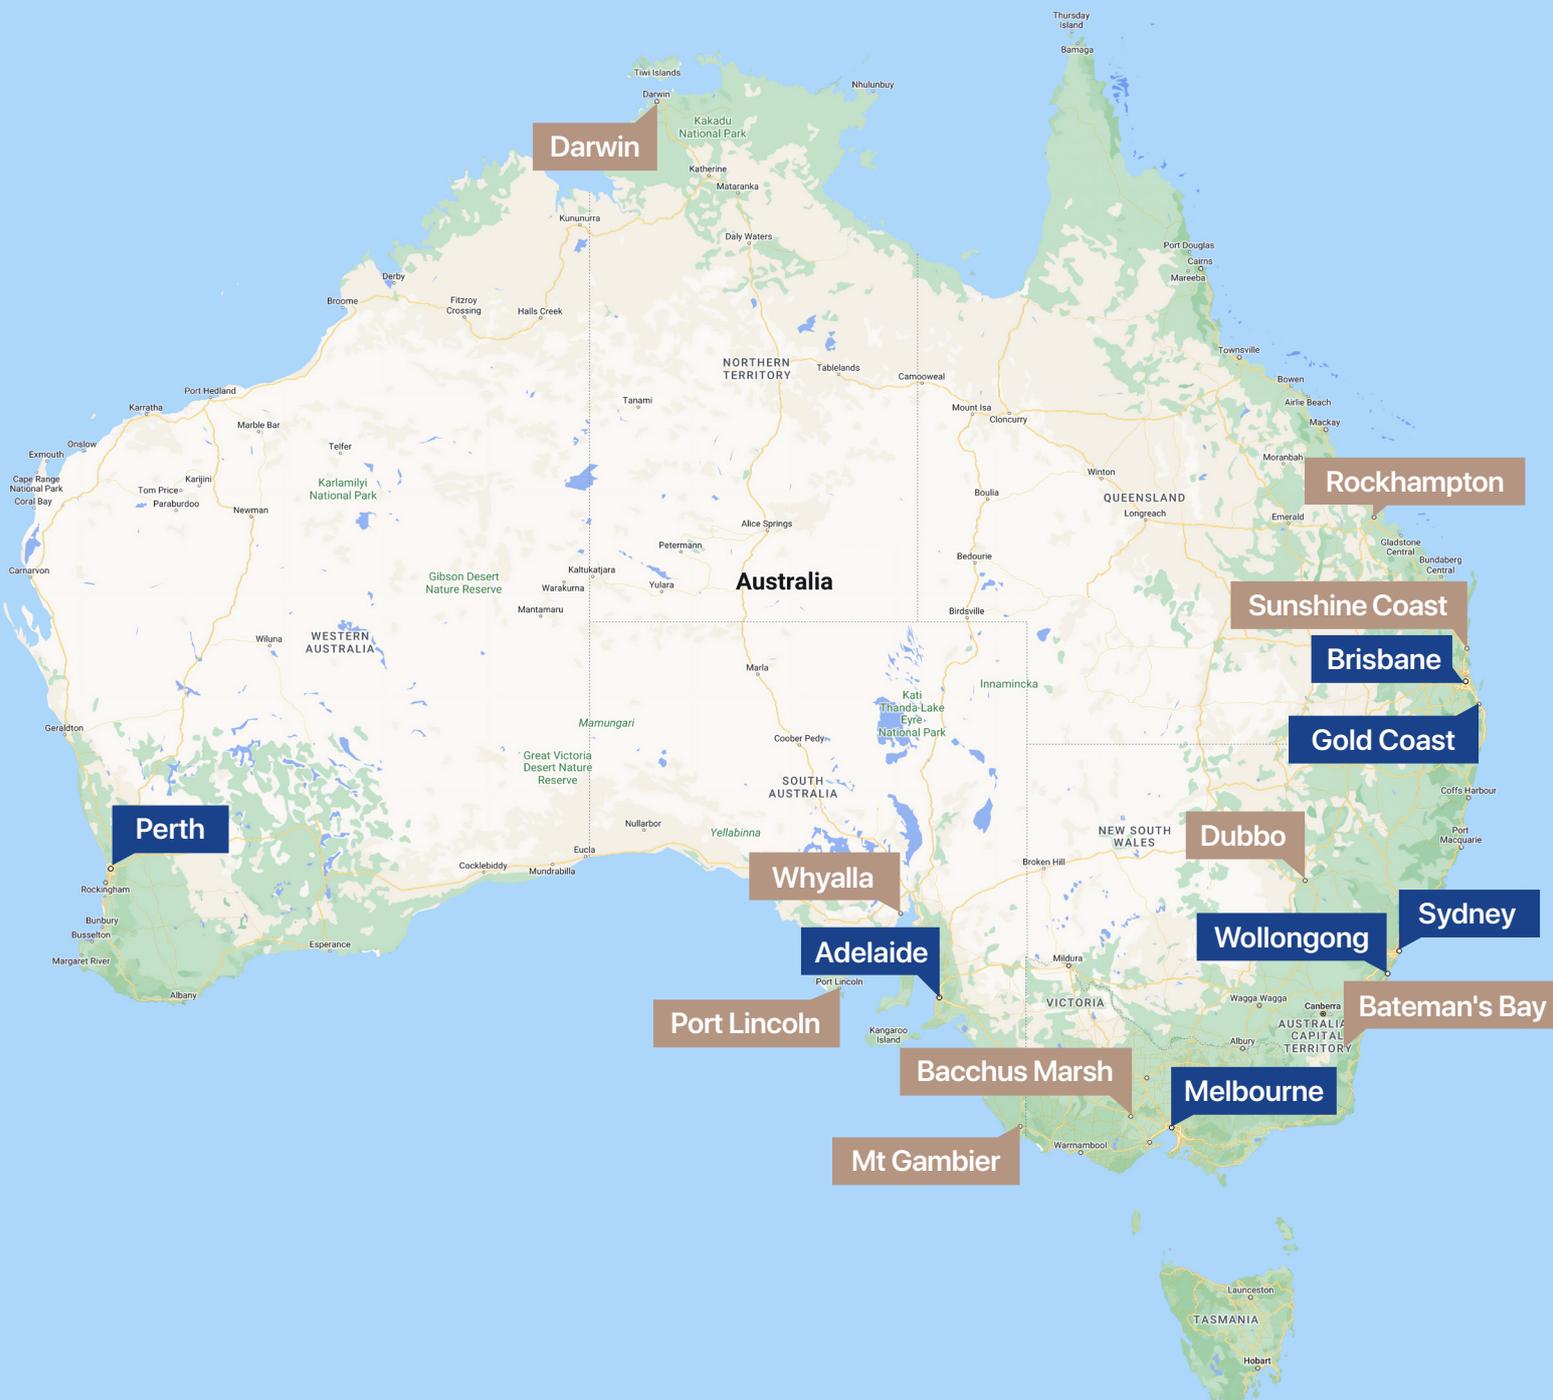

Treatment You Can Trust Wherever You Live.

With a growing network of dedicated All-on-4[®] Dental Implant Super Clinics and Accredited Partner Clinics across Australia, your next smile could be closer than you think!

All-On-4[®] Dental Implant Treatment Journey

Step 1 All-on-4[®] Consultation

Your journey begins with a personalised consultation at a Next Smile Australia clinic. In a supportive, judgment-free space, our team explores your dental and health history, assesses your goals, and determines your suitability for All-on-4[®] treatment. Using advanced tools like 3D jawbone scans, digital impressions, and photography, we present a complete picture of your current smile and the exciting possibilities ahead.

Step 2 Diagnosis and Treatment Preparation

Based on your consultation, a tailored diagnosis and treatment plan is developed. Our labs begin crafting your custom-made provisional teeth using your scans and impressions – ready for fitting after surgery.

Step 3 All-on-4[®] Surgery

Four high-quality Nobel Biocare implants are placed into your jaw to support your new smile. Within 24 hours of surgery, you'll receive your provisional teeth and get a first look at your transformation.

Step 4 Post-Surgery and Final Teeth

While you enjoy your provisional teeth, Next Smile Labs carefully design your final set. Following the MALO protocol, we monitor your healing and implant stability, conduct trial fittings, and refine shape and colour to ensure your final teeth meet your expectations.

Step 5 Aftercare

Good oral hygiene and regular professional cleaning are vital. The MALO protocol ensures predictable, long-term success with a 98%¹ success rate. While your implants aren't prone to decay like natural teeth, consistent care maximises their longevity. Our All-on-4[®] Dental Implant Warranty reflects our ongoing commitment to safety and patient satisfaction.

Treatment Options

Transparent “No Surprises” Pricing

We understand that the All-on-4[®] treatment represents a significant investment. We believe it’s an investment that will pay many different dividends.

We are transparent in our pricing so you can judge for yourself exactly what Next Smile Australia offers compared to other providers. We present the fees in a way that helps you understand the costs for the entire treatment process, using our Gold Standard Malo Protocol for All-on-4[®] treatments.

One price upfront for your entire treatment means no unexpected surprises. You may also take advantage of payment options tailored to your needs.

All-on-4® costs are based on the standard application of the All-on-4® treatment concept, other fees may apply if a patient requires additional implants or other related dental treatment to support their individual needs.

*Prices are for single arches (1 Arch = Upper or Lower Jaw).

*fees don't include Anaesthetist fee (if required) which is paid directly to the Anaesthetist. Day facility fee not included (if required).

** Zygomatic implants are at additional cost if required.

^Next Smile Australia recommend using the Malo Protocol. The 98% success rate of All-on-4 is based on the two bridge Malo Protocol i.e. Gold or Platinum options.

Payment Options

We offer upfront and flexible payment plans and early superannuation access through our trusted partners, making it easier to start your All-on-4[®] treatment today. Your treatment coordinator will guide you through the options to find the best payment method for your needs and help you begin your smile journey with confidence.

Upfront Payment

For patients who choose to pay in full – whether for a single or double arch procedure – this option offers a quick and straightforward way to streamline the process.

Accessing Superannuation

At Next Smile Australia, we work with third-party providers who can assist you in applying for early release of superannuation on compassionate grounds. Approval is granted by the ATO and is subject to specific eligibility criteria. Please note that provider fees apply and vary. We also recommend speaking with your tax advisor to understand any tax implications related to the withdrawal.

Payment Plans

At Next Smile Australia, we offer flexible payment plan options through trusted partners. Our preferred provider, MediPay, offers up to \$55,000⁴ in financing for All-on-4[®] dental implants, with conditional approval in minutes. Enjoy flexible terms, no lock-in contracts, and the option to exit early after 12 or 24 months – often with discounted rates for added savings and flexibility.

⁴ Payment plans via third-party providers. Terms and conditions apply. Pricing subject to change.

Meet Our Experienced Next Smile Australia Team

Your primary objective should be to identify a highly skilled team who possess genuine experience. To minimise dental implant risks, you need a team who are leaders in All-on-4[®] Dental Implants, performs the procedure as a routine process and are willing to provide each patient with the insight and information they need to make informed decisions. When you choose Next Smile Australia for your treatment, you can be confident that we have the team of professionals you need for this type of care.

Being honoured with the All-on-4[®] Centre of Excellence award by the world leading Swiss Dental Implant manufacturer Nobel Biocare is further acknowledgement of what thousands of our patients already know.
